## Experience

**Worldpay / FIS** - *Principal Software Engineer - promoted December 2019, Senior Software Engineer - promoted November 2015, Software Engineer*

March 2015 - Present

Working on HPP (Hosted Payment Pages) platform, the next generation of payment pages for online commerce. Supporting multiple languages, currencies, international alternative payment methods and card schemes. Processing high volumes of transactions, in the billions annually. Used by well-known retailers, corporates, government agencies and smaller businesses.

Technical lead working with the business (product manager, project owner, service owners, enterprise architecture, enterprise security, other teams, etc) to implement projects, release lead, defining release process and SDLC, mentoring, department presentations, shifting platform from proprietary licensing to save costs, code reviews, high-level designs, responsible for platform security, interviewing candidates, improving interview process, running training sessions with various teams, BRO model / on-call production support.

Using Java 11, Spring Boot, Kubernetes, Docker containers, AWS, OpenShift, Ansible, historically Oracle stack (Weblogic, DB, Coherence), Fastly, Angular and much more.

Experience with working on legacy gateway, mission critical, high-throughput systems. Migrating legacy systems. Based in team using Scaled Agile (SaFE), transformed from Scrum to Kanban, using Jira / Rally, physical whiteboards / walls.

**Proxama** - *Software Engineer*

Nov 2014 - March 2015

Working on a PCI-compliant product, CardGateway, to provide token and risk management of contactless payments for Visa and MasterCard. Using JEE6, Glassfish and C#.

**Proxama** - *Research & Development*

Aug 2014 - Oct 2014

Design of the CardGateway Issuer System product, graph databases for risk analysis, EMVTT / PoS solution. Software for demos presented to tier one/two clients, including major banks.

**University of East Anglia** - *Teaching Lab Assistant* - helped with *Discover Computing* school visit.

## Education

**Bachelor of Science (BSc)** - Computer Science

2014

First Class (Honours) Starred (I\*) - 83.48% weighted average  
University of East Anglia

Year 1: 90.71% - *Computing Fundamentals, Computing Revolution, Mathematics for Computing A, Computing Systems 1, Computing Systems 2, Programming 1.*

Year 2: 81.77% - *Theoretical Computing, Database Systems, Graphics 1, Architectures & Operating Systems, Data Structures & Algorithms, Programming 2.*

Year 3: 82.66% - *Information Retrieval, Embedded Systems, Networks, Software Engineering 2, Project.*

## Third Year Project

**The Automated Assessment of Programming Skills** (graded 94.4%)  
An open-source distributed system, which can be clustered across multiple nodes/instances using RMI communication, to automatically mark Java programming assignments using dynamic and static analysis.
